

Guarantee of Origin

issued for

Dalforsån AB

This Guarantee Certificate confirms that all electricity you consume comes from renewable sources such as sun, wind, water or biofuel.

The electricity you get from your power socket is a mixture of all power delivered through the network. Our Guarantee of Origin implies that we buy the corresponding amount of electricity you use from renewable sources. An external, authorised auditor performs annual reviews to verify whether the amount of electricity we buy from renewable sources matches our electricity sales.
